Official Compliance Document | Version 2026.1

DATA PROTECTION & PRIVACY POLICY

Effective Date: June 25, 2026

This Data Protection & Privacy Policy (the "Policy") outlines the commitment of Decorum IT Solutions, owned by Mr. Oheneba Michael Baah (referred to as the "Service Provider"), to protect the privacy and personal data processed through the Skoola School Management System (the "Software" or "Platform").

This Policy applies to all administrators, teachers, students, parents, and other authorized users of Skoola. By using the Platform, the contracting School agrees to comply with and enforce these privacy standards within its academic community.

SECTION 1

REGULATORY COMPLIANCE & LEGAL FRAMEWORK

1.1 The Service Provider warrants that all personal data collection, processing, and storage activities conducted on Skoola are designed in accordance with the Data Protection Act, 2012 (Act 843) of the Republic of Ghana.

1.2 For the purposes of this Policy, the Client (the School) acts as the Data Controller, determining the purposes and means of processing student, staff, and parent data. Decorum IT Solutions acts as the Data Processor, processing information strictly on behalf of, and under instructions from, the School.

1.3 Both parties agree to uphold the 8 basic principles of data protection as defined by Ghanaian law: accountability, lawfulness, specification of purpose, compatibility of further processing, quality of information, openness, data security safeguards, and data subject participation.

SECTION 2

TYPES OF INFORMATION COLLECTED

Skoola collects and processes only the information necessary for administrative, academic, and financial operations. This includes:

2.1 ADMINISTRATIVE DATA: Full name, official email address, phone number, and designation of the school's system administrators to enable portal setup and management.

2.2 STAFF & TEACHER DATA: Name, contact details, employee identification number, professional qualifications, and classroom assignments.

2.3 STUDENT RECORDS: Full name, date of birth, gender, class/grade placement, admission number, attendance logs, exam marks, grades, progress reports, and disciplinary logs.

2.4 PARENT & GUARDIAN DATA: Full name, relationship to student, telephone number, email address, residential address, and school bill payment history.

2.5 USAGE & SYSTEM LOGS: IP addresses, login timestamps, browser types, and database transaction logs. These are stored for security auditing, diagnostic logging, and to prevent unauthorized access.

SECTION 3

ENHANCED PROTECTION FOR MINORS

3.1 The Service Provider acknowledges that student records processed on the system often belong to minors (children under the age of 18). Enhanced security controls are maintained to safeguard this information.

3.2 The School, as the Data Controller, represents and warrants that it has secured the necessary parental or guardian consents before entering any minor's personal data into the Skoola platform.

3.3 Decorum IT Solutions will never utilize minor data for advertising, profiling, or behavioral marketing, and will never contact student users directly unless explicitly authorized for tech support.

SECTION 4

PURPOSE & USE OF DATA

All personal and organizational data processed through Skoola is used strictly to:

- 4.1 Create, customize, and operate the School's dedicated subdomain portal.
- 4.2 Process student enrollments, academic transcripts, class schedules, and report cards.
- 4.3 Deliver system alerts, report cards, and payment receipts to parents via SMS or email.
- 4.4 Enable administrators and teachers to track fee payments and general accounts.
- 4.5 Diagnose technical glitches, optimize system speeds, and resolve customer support tickets.
- 4.6 Conduct internal audits to ensure platform integrity and compliance with security regulations.

SECTION 5

DATA STORAGE, LOCATION, AND BACKUPS

5.1 All data processed by Skoola is stored in secure cloud database servers with physical and logical access control restricted strictly to authorized engineering staff of Decorum IT Solutions.

5.2 Automated incremental database backups are executed daily. Backup files are encrypted and transferred to a secondary secure cloud location to protect against catastrophic server failures.

5.3 The School's operational databases are kept isolated to prevent cross-tenant data leakage between different educational institutions hosted on Skoola.

SECTION 6

THIRD-PARTY DATA SHARING LIMITS

6.1 Decorum IT Solutions will never sell, lease, trade, rent, or monetize school data, student information, or parent contact details to any third-party marketing firms or external organizations.

6.2 Data is shared only with certified infrastructural partners necessary to provide the service (e.g., hosting providers and SMS gateway providers for student notification delivery). These partners are contractually bound to the same data security rules.

6.3 The Service Provider will only disclose data to government bodies or law enforcement authorities when legally compelled to do so by a valid court order or official directive issued under the laws of the Republic of Ghana.

SECTION 7

RIGHTS OF DATA SUBJECTS

7.1 Pursuant to Act 843, students, staff, and parents maintain rights to access, correct, or request the deletion of their personal information held on the Skoola system.

7.2 Individuals wishing to exercise these rights must contact the School administrator (Data Controller) directly. The School administrator has full authority to edit, archive, or delete user records via the admin dashboard. Decorum IT Solutions will assist the School in fulfilling such requests if technical intervention is required.

SECTION 8

TECHNICAL & ADMINISTRATIVE SECURITY MEASURES

8.1 **ENCRYPTION:** Skoola utilizes industry-standard Secure Socket Layer / Transport Layer Security (SSL/TLS) encryption for all data in transit between users and the platform, and robust encryption for sensitive data stored at rest.

8.2 **ACCESS CONTROLS:** Role-based authorization ensures users (admins, teachers, students, parents) can only access the specific information blocks required to execute their system functions.

8.3 **LOGGING:** All login attempts, data updates, and administrative changes are recorded in an immutable audit log to track and investigate potential unauthorized operations.

SECTION 9

DATA BREACH PROTOCOLS

9.1 Decorum IT Solutions maintains a robust incident response protocol to address any potential unauthorized database access, leakage, or security breach.

9.2 Upon confirming a data breach affecting the School's records, Decorum IT Solutions shall notify the School's designated administrator in writing within seventy-two (72) hours.

9.3 The notification shall describe the nature of the breach, the classes of records involved, the immediate containment steps implemented, and recommendations for user password resets or account locks.

SECTION 10

DATA RETENTION, PURGING, & CONTACT INFORMATION

10.1 **DATA PURGING:** Upon termination of the School's subscription agreement, the Service Provider will preserve the database for a grace period of thirty (30) days to allow for data export. After this grace period, all operational tables, files, and backups will be permanently and irrecoverably purged from our primary and secondary storage disks.

10.2 **POLICY AMENDMENTS:** Decorum IT Solutions reserves the right to update this policy to align with changing regulatory standards. Significant updates will be communicated to the School's administrator.

10.3 **CONTACT DETAILS:** For queries regarding data protection, please contact the software proprietor:
