SchoolHub - Frequently Asked Questions (FAQ)

Official Product Reference & Administrative Guide

Owner & Proprietor: Oheneba Michael Baah
Publisher: Decorum IT Solutions
Version: 2026.1

Document Overview

This FAQ reference guide is compiled for School Board Directors, Proprietors, Administrators, Teachers, and IT coordinators evaluating the **SchoolHub** SaaS school management platform. Prepared by **Decorum IT Solutions**, this document answers technical, financial, operational, and onboarding inquiries.

1. Executive & General Information

Q1.1: What is SchoolHub?

SchoolHub is a comprehensive, multi-tenant cloud school enterprise resource planning (ERP) platform developed and managed by **Decorum IT Solutions**. It consolidates core school administration, financial billing, student grading, computer-based exams (CBT), human resources, logistics, e-learning, and parental notifications into a single, cohesive database environment.

Q1.2: Who is Decorum IT Solutions?

Decorum IT Solutions is a premier technology services and enterprise software company. We white-label, host, secure, deploy, and support SchoolHub, ensuring schools receive top-tier cloud stability, technical training, and system customizations.

Q1.3: Can SchoolHub accommodate multiple campuses or schools under one management?

Yes. SchoolHub is built on a multi-tenant architectural framework. A single administrative board can manage multiple class structures, financial accounts, and independent teacher-student tables, all visible from a unified Executive Dashboard.

2. Technical Infrastructure, Hosting, & Data Security

SCHOOLHUB SECURE CLOUD LAYER	
[Enterprise Database]	--> PostgreSQL & Cryptographic Auth via Supabase
[Data Protection]	--> 256-bit SSL Transit & Role-Based Access
[Backup Routine]	--> Automatic 24-Hour Redundant Backups
[Offline Support]	--> Local storage syncs on internet restoration

Q2.1: Where is our school's data hosted, and who owns it?

All school data is securely hosted on enterprise-grade cloud databases (PostgreSQL powered by Supabase). **Your school owns 100% of its data.** Decorum IT Solutions acts as the hosting custodian. You can request a full backup export of your student, financial, and grade tables at any time.

Q2.2: How secure is student and financial data on SchoolHub?

We implement industry-standard security protocols: * **Cryptographic Authentication:** All passwords are encrypted using secure cryptographic hashing algorithms. * **Role-Based Access Control (RBAC):** Users can only access menus allowed by their role (e.g., Teachers cannot view school collections dashboards, and Parents cannot modify academic records). * **SSL Encryption:** All data in transit between school devices and the database is encrypted using 256-bit SSL certificates.

Q2.3: What happens if the school's internet goes down? Will we lose data?

No. SchoolHub has built-in offline resiliency. Teachers can mark daily attendance and run digital Computer-Based Tests (CBT) locally on their device browsers. Once an active internet connection is detected, the browser auto-syncs the data back to the cloud.

Q2.4: How often are backups taken? What is your disaster recovery plan?

SchoolHub runs automatic, encrypted 24-hour backup cycles. In the highly unlikely event of a server disruption, Decorum IT Solutions can restore your entire school's portal to its exact state from the previous day in under 15 minutes.

3. Academic Operations, Grading, & CBT

Q3.1: Can SchoolHub handle our specific grading framework (e.g., custom GPAs or letter grades)?

Yes. The SchoolHub **Grading Scales** module allows academic directors to configure custom grading parameters (e.g., setting an 'A' from 80-100%, or calculating GPAs based on distinct course weight credits). It fits national, British (IGCSE), American, or international curriculums.

Q3.2: How does the automated Timetable Builder prevent room or teacher clashes?

The scheduling engine validates assignments in real-time. If you attempt to assign Teacher A to Class 9A at 10:00 AM, and they are already assigned to Class 10B at that same time, the system blocks the entry, flags a double-booking alert, and suggests open slots.

Q3.3: How does the Computer-Based Testing (CBT) module prevent cheating?

The CBT module has several security layers: * **Question Shuffling:** Randomizes question order for every student. * **Time Enforcements:** Auto-closes the exam window the second time expires. * **Lock-down Alerts:** If a student attempts to navigate away from the test tab to search for answers, the dashboard flags a warning to the administrator.

Q3.4: How long does it take teachers to compile end-of-term report cards?

With SchoolHub, report cards are generated **instantly**. Once teachers key in regular classroom assignments and final exam marks, the report card engine auto-calculates averages, totals, GPAs, class rankings, and appends pre-configured principal comments and signatures into a printable transcript.

4. Financial Management, Billing, & Online Payments

Q4.1: How does SchoolHub prevent cash theft and billing errors?

By replacing paper receipts with digital ledgers, SchoolHub seals financial leakages: * **Zero-Edit Receipts:** System receipts are generated with secure, unique transaction IDs that cannot be duplicated or edited post-payment. * **Audit Logs:** Every financial input (invoices, collections, store sales) records the user, date, and IP address. * **Reconciliation:** Daily reports show exactly who received cash, matching physical funds to system logs.

Q4.2: Can we handle uniform, book, and stationery sales inside the platform?

Yes. SchoolHub features an integrated **Inventory Sales** module. This functions as a point-of-sale shop terminal. When a parent buys a uniform, the storekeeper records the sale, printing an automated invoice receipt and deducting the item from live inventory counts.

Q4.3: How are scholarships and student discounts managed?

The **Scholarship Management** module enables administrators to allocate custom scholarships or fee discounts (e.g., a 10% sibling discount) to a student profile. The system automatically subtracts this amount from the student's main term invoice prior to dispatch.

Q4.4: Can parents make payments directly online?

Yes. SchoolHub supports direct payment integration (Mobile Money, Card, or Bank transfer). Once a parent pays via the Parent Portal, the invoice status changes to "Paid" automatically, a digital receipt is sent, and the school collection account updates in real-time.

5. Staff, HR, & Payroll Operations

Q5.1: How does the automated Staff Payroll module operate?

The **Payroll Processing** system integrates with staff attendance. At the end of the month, the accountant initiates payroll. The engine pulls basic salaries, adds custom allowances, deducts national taxes or unpaid absences, and generates individual printable payslips in a single click.

Q5.2: How does the system handle teacher appraisals and lesson planning?

SchoolHub includes an HR **Performance Insights** dashboard. Heads of Departments (HOD) can approve weekly digital lesson notes and rate instructional quality. Student grade progress and parent feedback metrics feed directly into the teacher's annual appraisal score.

Q5.3: How do staff apply for leave?

Teachers submit digital **Leave Requests** from their individual dashboards. The administrator gets a notification, reviews the teacher's leave balance, schedules a substitute replacement, and approves the request digitally.

6. Student Portfolios & Whistleblower Safety

Q6.1: What is the Student Portfolio Gallery module?

The **Student Portfolio Gallery** is a visual showcase for student accomplishments. Teachers can upload images, PDF certificates, and essay files highlighting a student's creative art projects, sports achievements, or academic awards. Parents log in to view and download these files from a dedicated milestones gallery.

Q6.2: How does the Anonymous Whistleblower Module work?

The **Whistleblower Module** is an internal safety portal. Students or staff can report sensitive incidents - such as exam cheating, bullying, or safety concerns - directly to the Principal. * **Anonymity Guarantee:** The reporter can toggle "Submit Anonymously," which strips their username, email, and IP address from the database record, storing only the encrypted report contents and urgency level.

7. Parent Engagement & Communications

Q7.1: Do parents have their own SchoolHub login credentials?

Yes. Every parent receives unique login details to the secure **Parent Portal**. From their dashboard, parents can monitor attendance, view digital report cards, view fee invoice payment histories, message class teachers, and check homework deadlines.

Q7.2: Can we send broadcast announcements to all parents at once?

Yes. The **Multi-Channel Communication** module allows school admins to broadcast instant announcements via bulk SMS, email bulletins, and mobile push notifications with a single send button.

8. Onboarding, Spreadsheet Migration, & Training

OUR 4-WEEK DEPLOYMENT SPRINT	
[WEEK 1]	Setup configuration & free historical spreadsheet ingestion
[WEEK 2]	Billing, fee invoice configurations & accounts setup
[WEEK 3]	Hands-on teacher dashboard workshops & lesson planning
[WEEK 4]	Parent portal rollout, ID cards print, and system GO-LIVE

Q8.1: How long does it take to deploy SchoolHub at our school?

Deployment takes **4 weeks**. Decorum IT Solutions manages the technical setup, database configuration, staff training schedules, and parent portal rollout.

Q8.2: Can we migrate our historical spreadsheet records into SchoolHub?

Yes. Decorum IT Solutions provides **Free Spreadsheet Data Migration**. You hand us your historical Excel files (students, staff, grading scales, past term scores), and our data engineers format and import them directly into the Postgres database.

Q8.3: What training and support does Decorum IT Solutions provide?

We provide comprehensive training: * **Staff Training Workshops:** Structured virtual or on-site sessions for teachers and administrators. * **Video Tutorials:** Short, step-by-step video guides for common system workflows. *

Dedicated Support Helpline: A direct WhatsApp/Email support line for school operators.

Q8.4: How can our school get started with a pilot?

Contact the Decorum IT Solutions partnerships team to request a customized demo sandbox preloaded with your curriculum details. Visit our website at **[Website URL]** or email us at **partners@decorumitsolutions.com**.
